

A vibrant, cartoon-style poster for the Western Maryland STEM Festival. The background is white and filled with various scientific and technological icons: a laptop with a bar chart, a calculator, a magnifying glass, a microscope, a globe, a satellite dish, a rocket, a pencil with an astronaut riding it, a molecular structure, a gear, and a test tube. The main title is centered in a bold, sans-serif font. Below the title, the date and time are listed. A large QR code is positioned in the center of the poster. At the bottom, two cartoon scientists in white lab coats are shown. The scientist on the left is holding a magnifying glass, and the scientist on the right is holding a molecular model. In the foreground, there are illustrations of laboratory equipment: a beaker on a stand, a flask on a stand, and a test tube.

Western Maryland STEM FESTIVAL

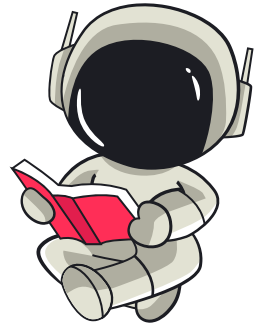

OCTOBER 26, 2024

1 - 4 PM

Where?

Frostburg State University
Education & Health Sciences Building,
2nd Floor

What?

The Maryland STEM Festival believes that everyone should be able to experience STEM. To that end, we have prepared with Frostburg State University to host the Western Maryland STEM Festival. Northrop Grumman, Destination Imagination, Allegheny Department of Emergency Management, and KidWind have joined us to present this fun afternoon of STEM activities

**We thank our sponsors for helping us
fund this event!**
